#### 1 Introduction

Cette extension est une nouvelle implémentation de l'extension ifpdf de Heiko Oberdiek, intégrant une structure simplifiée et une mise à jour pour fonctionner avec la version actuelle de LuaTFX.

L'extension définit un nouveau booléen, \ifpdf, qui est vrai pour pdfTEX et pour LuaTEX en mode PDF et qui est faux sinon.

## 2 Implémentation

#### 1 (\*package)

Si **\ifpdf** n'a pas été définie, elle l'est alors, en faisant attention à ce qu'elle soit externe en plain  $\text{T}_{\!E}\!X^1$ 

- 2 \expandafter\ifx\csname ifpdf\endcsname\relax
- 3 \csname newif\expandafter\endcsname\csname ifpdf\endcsname
- $4 \ensuremath{\setminus} \mathtt{else}$

Si \ifpdf est déjà défini mais que \pdftrue n'est pas défini, le traitement cesse.

- 6 \ifx\PackageError\undefined
- 7 \begingroup\def\PackageError#1#2#3{\endgroup\errmessage{#2}}
- 8 \fi
- 9 \PackageError{ifpdf}{incompatible ifpdf definition}{}

<sup>\*</sup>Ce fichier a pour numéro de version v3.1 et a été mis à jour le 14/05/2016. Son titre original est « *The ifpdf package* ». Merci de soumettre les anomalies rencontrées à l'adresse https://github.com/ho-tex/oberdiek/issues.

<sup>1.</sup> N.D.T. : la traduction pour rait être fausse, le texte original étant « taking care that it is outer in plain  $T_{\!F\!X}$  ».

```
10 \expandafter\expandafter\expandafter
11 \fi
12 \fi
```

Sinon, le booléen vaut faux à moins que \pdfoutput(\outputmode) ne soit plus grand que zéro. Pour LuaTeX, le test est fait en Lua dans la mesure où les primitives de TeX peuvent ne pas être activées et que le nom de la primitive peut être \pdfoutput ou \outputmode selon le numéro de version de LuaTeX.

 $13 \left| \text{iffalse} \right|$ 

 $\begin{array}{l} 28 \ \texttt{\fi} \\ 29 \ \texttt{\gray package} \end{array}$ 

 $14 \ifx\directlua\undefined$ 

```
Sans LuaT<sub>F</sub>X.
15 \verb|\begingroup\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter\expandafter
 16 \expandafter\ifx\csname pdfoutput\endcsname\relax
 17 \setminus else
                               \ifnum\pdfoutput>0 %
 18
                                               \pdftrue
19
20
                              \fi
21 \fi
22 \ensuremath{\setminus} \text{else}
 Avec LuaTeX.
23 \neq 1
24 \text{ if (tex.outputmode or tex.pdfoutput or 0)} > 0 \text{ then}
25 tex.print('\string\\pdftrue')
26 \; \mathrm{end}
27 }
```
